Question	Choices
<p>Assalamualaikum! I am \${enum_name}. I am working with GiveDirectly and a2i. We're conducting a census of all the households in this union for a programme to understand the impacts of floods.</p> <p>Your area was chosen based on flood prediction data. We will ask you some basic information about your household and experience with floods. The survey will last about 20 –25 minutes. While there is no direct benefit or risk to you, the information will help in designing beneficial interventions. Your responses will be confidential and stored securely. The survey will also be used to register you for potential flood relief programmes we run in this area. At the same time we will collect the GPS of your home so that your home can be easily identified later.</p> <p>Before we proceed, I'd like to explain how we handle your information and seek your consent: • Your participation is voluntary, and you can stop at any time. • Your data will be anonymized and may be used for research publications. • You have the right to know who your information is shared with, request changes or deletion, and withdraw your permission. • By continuing, you acknowledge you've been informed of your rights and grant us permission to use your information for program eligibility, store it securely, share it with relevant parties, and contact you if needed.</p> <p>For questions, contact [contact person / IRB contact] : Toll free hotline number 333</p>	<p>[Enumerator Note]</p>
